CV — Nav Gill

Senior SDET · QA Automation Architect · AI-Enabled QA Engineer Location: Los Angeles, CA
Email: buildwithnav@gmail.com **LinkedIn:** linkedin.com/in/navinder-gill **GitHub:** github.com/buildwithnav

PROFESSIONAL SUMMARY

Senior SDET with 9+ years of experience designing test automation architectures for healthcare, clinical data pipelines, and regulated enterprise systems. Specializing in end-to-end data validation, CI/CD quality gates, and AI-assisted QA workflows using MCP integrations and prompt-driven tooling. Built QA organizations from scratch, achieved 85%+ automation coverage, and reduced regression cycles by 40%. AWS Certified Cloud Practitioner. Seeking senior remote SDET / QA Automation Architect roles.

WORK EXPERIENCE

Abbott — Sylmar, CA

Software Development Engineer in Test (SDET) Sep 2025 – Present

- Architected an enterprise test automation platform (.NET 9, C#, Playwright, xUnit, Oracle, Docker) with modular multi-layer architecture (UI + API + Database testing) — adopted by multiple teams as the standard forkable foundation for new automation projects
- Designed fluent API, flaky-test retry mechanisms, pre-flight health checks, BDD support via Reqnroll, and ADO test case sync with automated execution tracking. Built training curriculum for team adoption
- Built a SQL-first clinical data validation framework with externalized fixtures, Oracle DB connector, parameterized async queries, source-vs-target diff assertions, and per-run artifact isolation (CSV exports, SQL snapshots) for full audit traceability
- Validated clinical data pipelines end-to-end — ingestion, transformation, schema integrity, and replication across 20+ Oracle downstream tables with automated regression history tracking (new/persistent/resolved defects)
- Tested a multi-service AI orchestration platform end-to-end with Playwright — spanning .NET APIs, Angular UIs, Python retrieval services, and vector search. Validated MCP protocol integration, runtime tool discovery, PII detection, and multi-auth flows
- Built AI-assisted database validation utility using GitHub Copilot + Oracle MCP for prompt-driven querying and dynamic verification
- Enforce shift-left testing on APIs, contracts, record counts, and schema mappings across regulated 21 CFR Part 11 environments

Reliable Tire Depot — Santa Clarita, CA

Software Development Engineer in Test Apr 2024 – Aug 2025

- Built QA function from scratch — hired engineers, established frameworks, processes, and quality standards
- Achieved 85%+ automation coverage and 40% reduction in regression cycle time using Cypress across UI, API, and accessibility
- Engineered GitHub Actions CI/CD with matrix builds, fail-fast strategies, and smart retry mechanisms
- Implemented shift-left testing with Jest, Pact contract testing, and Xray + Jira traceability

Science37 — Culver City, CA

Senior Test Engineer Sep 2020 – Dec 2023

- Automated decentralized clinical trial platform — patient enrollment, eConsent, telemedicine, and site coordination workflows
- Built CodeceptJS / Puppeteer framework with role-based validation in a 21 CFR Part 11 regulated environment
- Mentored QA engineers on automation strategy, framework design, and best practices

Entertainment Partners — Burbank, CA

Software QA Engineer Sep 2018 – Jun 2020

- Developed Selenium BDD framework (Java, Cucumber, JUnit) for SSO, MFA, and SSPR authentication testing
- Built Postman API collections and drove Agile QA process improvements across release cycles

Kaiser Permanente — Pasadena, CA

Software QA Engineer Aug 2016 – Aug 2018

- Automated 500+ scenarios with Selenium for enterprise healthcare workflows; led JMeter performance testing

PROJECTS

- **Cypress-E2E** (github.com/buildwithnav/Cypress-E2E) — Full-stack Cypress testing framework covering UI, API, regression, and accessibility testing. Reusable commands, custom reporters, Slack notifications on run completion, GitHub Actions matrix builds.
- **cypress-broken-link-checker** (github.com/buildwithnav/cypress-broken-link-checker) — Open-source broken link checker for any webpage using Cypress.

SKILLS

Languages: C#, JavaScript, TypeScript, Java **Automation:** Playwright, Cypress, Selenium, CodeceptJS, Puppeteer **API / Performance:** Postman, Newman, k6, JMeter, Lighthouse CI, Pact **CI/CD:** Azure DevOps, GitHub Actions, Jenkins, Docker **AI Tooling:** GitHub Copilot, Claude Code CLI, Oracle MCP, Azure DevOps MCP, Playwright MCP **Frameworks:** xUnit, Jest, Cucumber, TestNG, JUnit, Mocha, Reqnroll **Databases:** Oracle, PL/SQL, PostgreSQL, pgvector **Management:** Jira, Xray, Zephyr, SpiraTest, Allure, Mochawesome **Methods:** Shift-Left, BDD, TDD, Agile, 21 CFR Part 11, HIPAA, GxP

EDUCATION & CERTIFICATION

B.Tech, Computer Science — Malaviya National Institute of Technology (MNIT), Jaipur | 2010 – 2014 **AWS Certified Cloud Practitioner**
